

Getting oNTRK – clinical and diagnostic implications of pan cancer inhibition

Wednesday, September 30th, 2020
4pm – 7pm CEST / UTC+2h

The meeting is aimed at pathologists and will deal with the topics of agnostic tumor therapy and NTRK diagnostic. Case discussions and virtual microscopy will be included.

Preliminary program:

**Pan-tumor precision oncology – NTRK inhibitors in the clinical routine
The clinician's expectations on the pathologist**

– Dr. Claas Wesseler

**From point mutations to chromosomal rearrangements –
the increasing complexity of molecular pathology**

– Dr. Markus Falk

An overview of NTRK diagnostics.

An introduction to the different technologies.

– PD Dr. Lukas Heukamp

Organizer:

Institut für Hämatopathologie
Fangdieckstraße 75 a | D-22547 Hamburg

Experts:

Dr. Claas Wesseler

Specialist for internal medicine and pneumology,
Asklepios Klinikum Harburg, Germany (TBC)

Dr. Markus Falk

Molecular biologist,
Institute for Hematopathology Hamburg, Germany

PD Dr. Lukas Heukamp

Pathologist,
Institute for Hematopathology Hamburg, Germany

CONTACT & REGISTRATION

For German participants, CME accreditation will be requested.

Please register until September 25th, 2020 at
